Sir,

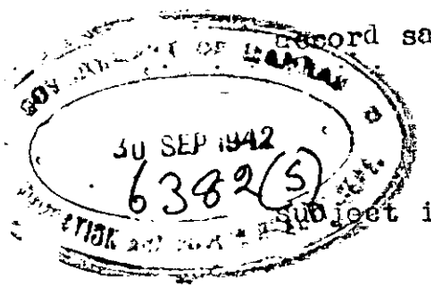
ENCLOSURES C.R

SPARE COPIES

Establishment-Public Health - Isolation Hospital Appointment of - Part time Registered Medical Practitioners Sanction - Solicited.

The Medical Officers in charge of Municipal Dispensaries were attending on the patients when cases of infectious diseases were admitted into the Isolation diseases sheds. The Director of Public Health in his proceedings R.F.B. No.19810-1-42 dated the 1st May 1942 informed the Municipal Health Officer in reply to a reference made by the latter that he is not generally in favour of Medical Officers of Ayurvedic and Unani Dispensaries being put in charge of Infectious Diseases Hospitals. The Municipal Health Officer has therefore suggested to the Council that one or two Registered Medical Practitioners may be appointed to treat such cases as and when occasion arises, on Rs.2 each per day. The Council has in its resolution No.11 dated the 31st July 1942 sanctioned the appointment of Registered Medical Practitioners as suggested by the Municipal Health Officer subject to approval of the Government. I therefore request that Government may be pleased to

accord sanction



record sanction for the appointment.

A copy of the council's resolution on the subject is enclosed.

Commissioner Delegate.

R. No. 1721-V2-42 dated 23rd November 1942.

Sir,

Establishment - Mangalore Municipal Council - Isolation Hospital - employment of part time Rural Medical Practitioners.

Ref:-- Government Memo. No. 6382(S) 42-2 D.2. P.H. dated 17-10-42.

G.O.No. 2072 P.H., dated 16-9-33 referred to in the above is with respect to smallpox and chickenpox hospitals whereas the isolation hospital in Mangalore is used for the segregation and treatment of cases of other infectious diseases also.

2. As regards smallpox and chickenpox hospitals, the question of medical attention by Health Officers does not arise in the case of institutions located in or attached to existing hospitals and dispensaries of Government or of local bodies. As regards smallpox and chickenpox hospitals not coming within the above category, in view of the simple nature of the treatment required in these instances, the Health Officers can look after them provided that the number of cases is limited. Even here, there may be cases which in the course of the illness develop complications as absesses etc., as actually happened once in Erode Municipality when the Medical Officer expressed his inability to attend on the case in view of the directions contained in G.O.No. 2072 P.H., dated 16-9-33 In this particular instances, the Health Officer was advised by the Director of Public Health to provide part time medical attendance by a private practitioner as this was more economical than employing a full time medical officer.

In the case of other infectious diseases, where unlike in chickenpox and smallpox, treatment is of a more elaborate nature and where complications in the course of illness are likely to develop more frequently than in smallpox and chickenpox, it is desirable that when it is impracticable for the medical officers of the regular institutions to attend to cases in the isolation hospitals, full time or part time medical practitioners are appointed. It may also be pointed out in this connection that as Health Officers are out of touch with clinical medicine, it is advisable to have persons practicing medicine daily to attend to treatment of the patients in the hospitals. Apart from these considerations, in a town like Mangalore which not only on account of its population, but also of its extent would keep the Health Officer fully engaged in so far as his regular duties are concerned, it would not be possible for him to attend to the treatment of cases in the isolation hospitals.

In view of the above circumstances, I recommend that the Municipal Council's resolution be approved. I would

also suggest the desirability of having this as s uniform policy in the case of all isolation hospitals which do not come within the category referred to in para 1 in'institutions similar to those in Mangalore..

Director of Public Health,
Madras.

R No. 8112/H[illegible]

dated 28th December 1942.

Sir,

Subject:- Establishment - Public Health - Municipal Council, Mangalore - Isolation Hospital - employment of part time registered Medical Practitioners.

Reference:- Government endorsement No.6382(S)42-4 D2/P.H., dated 7-12-42.

As the Health Officer is not a medical man in actual practice of Medicine, I am of opinion that only a practising doctor should be entrusted with the treatment of cases in Isolation Hospitals. It is not desirable that Medical Officers in charge of regular Hospitals or Dispensaries should be detailed to look after small-pox or chicken-pox cases in Isolation Hospitals. As in such isolation hospitals infectious diseases inclusive of small-pox and chicken-pox would be treated, I consider that a doctor from amongst the private practitioners should be requisitioned for this work, where only part time service is required.

I therefore agree with the remarks contained in letter R.No.1721-V2-42 dated 23-11-42 of the Director of Public Health, Madras.

The enclosures are herewith returned.
